Ontario Breast Cancer Program Guidelines

Brockville General Hospital offers the Ontario Breast Cancer Screening Program. This is a self referral program.

This program is open to women who are between 50-74 years of age who do not have a previous history of breast cancer; have no current acute symptoms and who do not currently have breast implants.

Women will receive an initial letter to begin screening at age 50 from Cancer Care Ontario. They will receive a reminder letter for follow up screening. This is usually every 2 years.

Primary Care Providers do not need to send in a requisition since this is a self referral program. OBSP appointments are currently available on Tuesday, Wednesday, Thursday and Friday afternoons. Women can call 613-345-5645 extension 51120 to book their own appointment.
