

Coronavirus (COVID19) and Pregnancy Information

The coronavirus (COVID-19) that is spreading globally will become more common in the weeks and months ahead in all areas of Canada and the U.S.. The Canadian federal government is predicting that 30%-70% of Canadians will acquire the infection.

There is limited data on the potential impact of the virus on pregnancy or newborns.

To keep up-to-date, regularly check in at: www.themothersprogram.ca or scan the QR code below with your phone.

If you have been diagnosed or have symptoms (fever, cough, difficulty breathing, sore throat), call your health care provider or your local Labour & Delivery unit **BEFORE** arriving so that isolation plans can be put in place to ensure that you don't transmit the virus to other patients or staff.
