CRITERIA FOR ADULT OUTPATIENT INTRAVENOUS IRON INFUSION Choose one of the following (attach labs if not completed at BGH): □ Documented intolerance/inadequate response to appropriate trial of oral therapy (At least 4 weeks) OR □ Insufficient time (4 weeks or less) to evaluate efficacy of oral therapy prior to upcoming procedure for patients with anemia and iron deficiency as above (e.g. prior to surgery). Plus 1, 2, OR 3 1. Diagnosis of iron deficiency anemia: Hemoglobin (Hgb) level less than 130 g/L with symptoms (e.g. Fatigue, restless legs). (For pregnant women, refer to Figure 1 on p. 4) □ Ferritin less than 50 µg/L. □ Transferrin saturation (TSAT) less than 20% (0.20), AND ferritin less than 100 µg/L 2. □ Anemia with chronic kidney disease: TSAT less than or equal to 30% (0.30) and ferritin less than or equal to 500 µg/L 3. □ Heart Failure patients (NYHA class II and III, EF less than 40%): TSTAT less than 20%, AND ferritin (ferritin less than 100 µg /L or 100 to 300 µg/L). (Evidence mostly for IV preparation) PATIENT PRESCRIPTION DRUG COVERAGE Please check 1, 2, OR 3: 1. □ Private drug insurance coverage available (Prescriber must provide the patient with a prescription for medication as per order selected below to take to pharmacy) 2. □ Ontario Drug Benefit coverage available (Prescriber must provide the patient with a prescription for medication as per order selected below to take to pharmacy) (check box a or b): a. □ Iron Sucrose (Ontario Drug Benefit Exceptional Access Program form must be completed by prescriber) b. □ Ferric Derisomaltose (Patient must meet Ontario Drug Benefit Limited Use Criteria: LU Code 610) 3. □ No private drug insurance or Ontario Drug Benefit coverage available. BGH Pharmacy Services to supply intravenous iron (Iron sucrose or ferric derisomaltose). (Physician to contact ACU at extension 51251 MEDICATION SUPPLY Please check 1 OR 2: 1. □ Patient will supply iron via prescription	Allergies: NKA or
Choose one of the following (attach labs if not completed at BGH): □ Documented intolerance/inadequate response to appropriate trial of oral therapy (At least 4 weeks) OR □ Insufficient time (4 weeks or less) to evaluate efficacy of oral therapy prior to upcoming procedure for patients with anemia and iron deficiency as above (e.g. prior to surgery). Plus 1, 2, OR 3 1. Diagnosis of iron deficiency anemia: Hemoglobin (Hgb) level less than 130 g/L with symptoms (e.g. Fatigue, restless legs). MEDICATIONS			
Please check 1 OR 2, AND fill in the blanks:			
 □ Ferric derisomaltose (e.g. Monoferric™) in 100mL 0.9% sodium chloride IV over 30 to 60 minutes (Maximum single dose up to 20 mg/kg body weight) (check box a or b): a. □ 500 mg (elemental iron) b. □ 1000 mg (elemental iron) 			
2. Iron Sucrose			
Iron sucrose 300 mg in 250 mL normal saline IV infused over 1.5 hours every days x doses OR			
☐ Iron sucrosemg IV in normal saline at a max rate of 140 mg/hr every days times doses			
Maximum total cumulative dose 1000 mg elemental iron administered in 14 days **Maximum single dose to be given at a time is 500 mg**			
Patients weighing less than 70 kg may require a longer infusion time			
Maximum 6 doses per course/New order will be required each course MONITORING			
_			
Heart Rate (HR), Respiratory Rate (RR), Blood Pressure (BP), Oxygen saturation (SpO ₂₎ prior to infusion, post infusion and PRN			
Monitor the patient for signs and symptoms of hypersensitivity for at least 30 minutes and until clinically stable post infusion			
INFUSION REACTION MANAGEMENT			
*** If symptoms improve within 30 minutes, consider resuming the iron infusion at half the previous rate*** *** If the patient remains hypotensive, consider 500 mL Sodium Chloride 0.9% (NaCl 0.9%) IV bolus. Do not resume the iron infusion***			
If the patient develops rash, pruritus, wheezing, dyspnea, dizziness, hypotension, peripheral edema, chest pain or anaphylaxis, stop infusion immediately and contact prescriber			
\square diphenhydrAMINE 25 – 50 mg IV for one dose if patient develops skin rash or wheezing			
PAIN/NAUSEA MANAGEMENT			
Pain Management ☐ acetaminophen 325 – 650 mg PO q4 h prn for pain			
Nausea Management ☐ dimenhyDRINATE 12.5 – 25 mg PO/IV q4 h prn for nausea or vomiting
